When it runs, the software gives excellent results but it often won't run. I've been using RealityCapture for a year or so now and enjoy its speed and the quality of the reconstructions. However, I have had issues with the Steam version, it often crashes or loses connection to Steam, causing me to lose my work. It appears the Steam version of RealityCapture has been having this issue for quite a few months now <https://steamcommunity.com/app/489180/discussions/0/1696048426815193753/>.

I still recommend RealityCapture, as I said the final models are my favorite of any similar software. But I recommend you purchase it from their website, not the steam version.. I only bought this game because it was 9p on the market! :) However, it actually turned out to be a very enjoyable and worthwhile game. Thoroughly recommend it, even at full price, to those who enjoy 3d puzzles.. Twisted and cruel, this game will satisfy only those with an open mind and looking for something new.

I loved the style, and the voice acting was just perfect 99% of the time.

Keep up the great work. Your development style is beyond the status quo.. You need patience for this game. You have to be prepared to fail, fail, fail, and almost make it once or twice before you fail again. This is one of those games that shows the difference between challenging and maddening. It's a pattern, but the grind isn't really worth it... I will say that the music was awesome and the custom track option was cool.

I can only recommend this game if you enjoy challenging your friends to be miserable or if you like to fail. Am I failure? Absolutely. Because of this game. Everything else was going great for me and then I played 64 and now I'm balding.. Sell the game half finished, make the other half DLCs. What are you? EA?. Great game, like many have said before it is a "WIP" im not going to criticize the game and name the pros and cons of it, but it is definitely one of my best experiences on Vr and has the potential to be an outstanding game.

Feels as good as it looks and sounds - which says a lot. Could replace Rocket League as my go-to twitchy video game sport. Or they can coexist happily. That would work too.. WOW!! Amazingly spectacular! I am totally blown away by the red pack. I am especially impressed with the quality of the formula one cars, just fantastic! If only we could get a full F1 grid. I am also loving the quality of all the cars in this pack. Great job guys!. This game reminds me of old school 'Senisble Soccer Euro Edition' in the best way, the free flowing football action. The speed of matches, the ball physics, it's all there. Even the animation style matches those old school 90s footie game. This game has nothing it doesn't need and everything it does, it's a refreshingly simple alternative to FIFA or PES for me.. Much better than Next 1 and 2. Lot's of neat mechanics, and the puzzles have a good challenge without being unintuitive. If you like the others you'll like this one and if you like this one you'll like the others. About 30-60 minutes to complete.. Nice music, cute pixel graphics, interesting idea, bloody murder, and achievements: all for a \$1.

I'd say it was a good deal.

Buy it only if it's on sale, it's a good hour or two's worth of fun.
